

56R

CERAMIC PUMPING SYSTEM

Portable standalone ceramic pumping system for conditioning ceramic mix and refilling ceramic injection machines.

Precise temperature control prevents binder separation and our unique pumping system reduces wear. The MPI 56R is designed to meet all your thermoplastic binder, abrasive material needs.

MPI 56R Features:

- 20 Gallon (76l) Ceramic Reservoir
- 200 cu. in. (3.2l) Single Shot Pumping Capacity
- Rigid Piping for Ceramic Transfer
- Hydraulic Quick Connect Fittings
- Swivel Casters for Portability

The MPI 56 features:

- Easy Maintenance
- Accurate 5-zone ceramic temperature control
- Sliding spool transfer valve
- Hardened components
- CE conformity
